Part III REASONS FOR ALLOWANCE

1. The following is an examiner's statement of reasons for allowance: The prior art of record does not teach, disclose, or suggest the claimed limitations of (in combination with all other limitations in the claim), a compressing device used to compress a static digital image using a wavelet transform to produce a first compressed image data file; a processing device used to calculate and compare the storage space left in a memory device, the storage space used in the memory device and the size of the first compressed image data file, when the storage space left in the memory device is less than the size of the first compressed image data file, part of the compressed image data files stored in the memory device is eliminated to store the first compressed image data file, otherwise the first compressed image data file is directly stored in the memory device, wherein the size of the eliminated part of the image data files is equally divided among the compressed image data files stored in the memory device; and a decompressing device used to decompress the first compressed image data file to produce image data file, and display it on the image display device as claimed in claim 1. Similar features are claimed in claim 4. Therefore, claim 4 is allowable over the prior art of record for the same reasons.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
